

High-Rise Residential

Protect your residents, their property, your investment and your reputation by providing fire safety and security systems to your next residential high-rise project

For more than 65 years, Oliver has been the premier choice in High-Rise Residential Protection

New construction and retro-fit projects

Oliver's dedicated team of specialists will create a custom design and install with minimal disruption to your tenants and staff

Our unparalleled team of designers and certified engineers will work with you to ensure your project meets both the functional and aesthetic needs of your architecture

Our diverse product line provides solution for safety notification, fire suppression and security systems, inspections, emergency service and maintenance making Oliver the ideal choice for making your building fire safe and life secure

Testimonial

"This was a challenging project to deliver on time, within budget, safely and with the minimal amount of disruptions, especially during the pandemic. The onsite sprinkler installers/pipe fitters were very respectful of the tenants/occupants and were faultless in their delivery through the entire project which was phased over four years. Many thanks for accomplishing all those challenges as well as improving the safety of all the Casa Farnese Building tenants/occupants."
