

OLIVER
FIRE PROTECTION & SECURITY

Inspections, Testing & Maintenance

Oliver Fire Protection & Security will work with you to design a maintenance or inspection program that is customized to fit your individual building's needs.

Multipoint checklist to ensure systems are fully operational

Full-Service Provider for all your life safety systems

Expedited certification reports

Inspections performed per NFPA standards and local AHJ requirements

Detailed deficiency repair solutions reviewed and returned quickly to empower decision-makers.

Since 1957, Oliver's team of certified inspectors has the proven experience and knowledge to keep your buildings up to date and protected.

Testimonial

"I wanted to personally take this opportunity not only to thank you but to commend you on the excellent jobs that your company has performed for us. From the sales presentations to follow up training, not a step was missed. It has been our continued pleasure to work with a company that delivers on their promises each step of the way."

Benefits of Life Safety Inspections

Lower System Maintenance Costs

Regular inspections allow you to locate and address small problems before they become major repairs

Reduce Safety Risks

According to the National Fire Protection Association, **59%** of incidents where fire sprinklers fail to operate were due to the system being turned off.

Lower Premiums and Avoid Costly Fines

Many insurance companies offer reduced premiums to clients who have their fire prevention systems regularly maintained. Regular inspections also help to avoid non-compliance fines from local jurisdictions.
